ASCENT LASER AESTHETICS

Men and women of all ages and skin types can benefit from Ascent Laser Aesthetics. Our products and cutting-edge laser technology offer corrective, rejuvenation, anti-aging and beauty enhancement treatments.

INJECTABLES & FILLERS

Choose from an array of options that temporarily prevent and lessen visible signs of aging by softening lines, filling in wrinkles and/or re-contouring the jawline for a refreshed, younger look.

BOTOX®

BOTOX® Cosmetic is a prescription medicine that is injected into muscles and used to temporarily improve the look of moderate to severe frown lines between the eyebrows (glabellar lines) and around the side of the eyes (crow's feet lines) in adults for a short period of time. This safe and quick procedure lasts approximately 3-4 months.

JUVÉDERM®

JUVÉDERM® XC is the smooth gel filler that is used to smooth away wrinkles around your mouth and nose instantly. With just one treatment, you'll see natural-looking results that can last up to a year.

Kybella™

Traditionally, excess fat underneath the chin, also known as a "double chin," was only able to be removed through surgery or liposuction. But advances in the aesthetic industry now make it possible to destroy chin fat with a simple injection process that requires no surgery or downtime. Kybella™ will painlessly restore tighter, more defined contours to your lower chin and jawline.

WRINKLE REDUCTION/ SKIN REJUVENATION

Ascent Laser Aesthetics offers a variety of treatments that improve skin texture, tone, and other skin irregularities to help reverse signs of aging, such as fine lines, wrinkles, and sun damage resulting in brighter, tighter, and smoother skin. We custom tailor our therapies for the desired results, specific needs and expected downtime for each patient.

Fractional Skin Resurfacing with Palomar Icon 1540®

Skin Revitalization with PicoSure®

Hands / Neck / Face

Skin Pigment with PicoSure®

Hands / Neck / Face

Pelleve RF®

This treatment tightens skin and reduces facial wrinkles for a younger, more refreshed look.

Eyes / Partial Face / Full Face

Photofacial

This skin treatment uses a light-based technology to boost collagen, lighten brown spots, and diminish broken capillaries. This therapy can also clear up acne or diminish certain blemishes and freckles.

Cheeks / Chest

Partial Face / Full Face

ThreeForMe™

Why solve one skin problem when you can solve three? The ThreeForMe™ treats fine lines, age spots, sun damage and unsightly veins all at the same time. It is recommended that patients plan on three treatments to see the best results.

HydraFacial™

This revolutionary “hydradermabrasion” procedure combines cleansing, exfoliation, extraction, hydration and antioxidant protection simultaneously, resulting in clearer, more beautiful skin with no discomfort or downtime. The treatment is soothing, moisturizing, non-invasive and non-irritating.

SCAR REDUCTION/ BODY CONTOURING

Scar Reduction

This treatment is fast, easy and provides remarkable results. Pulses of laser light are gently delivered to the treatment area to break down the scar tissue and help generate healthy new skin. You can expect to see an overall improvement in the tone and texture of the scar. A series of treatments may be required for desired results.

Body Contouring with SculpSure™

A non-invasive lipolysis of the abdomen, flanks, back, inner thighs, outer thighs now available for the submental (under the chin) area. It's designed to safely and effectively eliminate unwanted fat cells, resulting in permanent reduction in stubborn fat without surgery or downtime. Many patients start to see results as early as 6 weeks following treatment; optimal results are usually seen at 12 weeks. SculpSure™ is convenient, comfortable and safe for all body and skin types.

Abdomen | Back | Back Thighs | Chest | Chin

Flanks | Inner Thighs | Outer Thighs

STRETCH MARK TREATMENT/ HAIR REMOVAL / TATTOO REMOVAL

Stretch Mark Treatment

Stretch Marks are a common part of life for men and women. When the skin has been stretched too far or too fast – such as during puberty, pregnancy or weight fluctuation – these unsightly lines appear. Finally, there is a treatment that will reveal smooth and beautiful skin. Laser stretch mark treatment is fast, easy and virtually pain free.

Hair Removal

This safe and effective procedure uses laser energy which is absorbed by the dark pigments of the hair follicle beneath the skin's surface, damaging the active growing hair's life source, preventing hair regrowth. This procedure is most effective on light skin and dark, coarse hair. Treatment intervals vary every 4-10 weeks depending on treatment area.

Face (Per Area)
Hands
Under Arm
Arms or Chest

Face (full)
Abdomen or Bikini
Brazilian Bikini or Legs
Back

Tattoo Removal

Wish you didn't have that tattoo anymore? The PicoSure® sends laser pulses lasting one trillionth of a second, 100 times faster than a nanosecond laser, deep below the surface of your skin to target the underlying ink. The laser bursts shatter the pigment into tiny particles that the body can naturally eliminate through the immune system.
